Serving as a consulting partner at the intersection between innovation and our clients' needs, efficiently crafting meaningful user-experiences for government customers. By breaking down the most complex problems down to their basic elements we can craft modern digital solutions.

## Why Element?

### CMS Data Experience

Our team has established deep domain experience in insurance, claims, and quality data throughout the CMS ecosystem. We equip healthcare stakeholders with insights to make informed policy decisions through strategic data management, integrating diverse data sources, and conducting analysis.

### Leaders in DevSecOps

As some of the earliest practitioners of DevSecOps within CMS, we exemplify the significance of a carefully engineered CI/CD pipeline. Amidst unprecedented HealthCare.gov registrations, our team safeguards its stability and reliability.

### Enabling Interoperability in Healthcare

We build functionality using standards such as FHIR to allow for data interoperability between government agencies, providers, and patients. Guided by our long-time partnership with CMS and healthcare stakeholders, we advocate for patient data accessibility, striving to enhance the quality of care delivered.

### Consulting to Innovate

At Element, we act as consultative partners at the crossroads of innovation and our clients' needs. No matter the challenge, we identify and prioritize the appropriate methods, ensuring tailored solutions and using modern technologies.

## What Do We Do?

### CMS CCSQ

Quality Payment Program (QPP) Clinician Interface and Scoring (CIS)  
End-Stage Renal Disease Quality Reporting System (EQRS)  
HCQIS Enterprise Integrated Supplemental Testing (HEIST)  
Internet Quality Improvement & Evaluation System (iQIES)

### CMS CCIIO

Marketplace Systems Integration Healthcare.gov (MSI)

### CMS OEDA

Beneficiary Claims Data (BCDA) & Data the Point of Care (DPC) APIs

### FEMA HRVCR

FEMA Hardware Refresh to Virtual Cloud Resources

**We believe in a world where solutions we build improve the lives of those who use them, and the elements of Innovation, Collaboration, Integrity, Equity, Creativity are the foundation.**
